

Dear Graduate Students,

The Bundled Student Fee Package policy allows students taking only off-campus courses to be exempted from mandatory fees, except the technology and USG Institution fees. Because students receiving this package are not assessed the additional mandatory fees, they will only have access to the associated services when they opt in through payment for specific services. Thus, students wishing to access the sporting events or the Student Recreation Center must opt in by paying the costs on a per use basis. For access to the Student Health Center, students must pay the **\$40 per semester fee at the Health Center**. This flat rate provides students receiving the fee waiver with the same services as students who pay all fees. The Counseling and Testing Center is not covered through student fees so one need only be enrolled as a student to receive services from this office.

Questions about this policy can be directed to grad@gsu.edu.
